Source Info & Notes:

- All data on this page has been sourced from Census 2023 (see Totals by topic for individuals, (RC, TALB, UR, SA3, SA2, Ward, Health), 2013, 2018, and 2023 Censuses), Ethnicity (detailed total responses level 3), and Languages Spoken). Percentages provided for each topic are based on "Total Stated" (those who answered the related census question). They are not a percentage of "total population".
- The Katikati Township Urban -Rural area is the same as Katikati North and Katikati South Statistical Area Unit 2 (SA2s).
- The latest population estimates as at 30 June 2025. See Stats NZ Place Summary - Katikati (Urban Rural).
- The Disability Indicator combines all Census activity limitation questions to identify whether individuals (aged 5 years and over) have difficulty performing any of six basic universal activities because of a health problem. The activity limitations included are: seeing and hearing (even if wearing glasses/using a hearing aid), walking or climbing steps, remembering or concentrating, washing all over or dressing, and communicating (using your usual language). Read more at Stats NZ. This indicator is likely to underestimate people living with a disability. A more robust estimate of disability levels is available in the Household Disability Survey, but this is not available for small areas.
