Estimated Resident
Population (ERP)
June 2025²

In conjunction with

Data collated within this summary for Ōmanawa-Lower Kaimai are based on the **Kaimai SA2** (Statistics NZ Statistical Area Level 2)

The Kaimai SA2 is bounded to the west by the Kaimai Mamaku Conservation Park ridgeline and to the north by the Wairoa River and Poripori Road. The eastern perimeter follows the rural transition bordering Pyes Pa, while the southern point tapers toward the junction of State Highway 5 (at the Galaxy Rd Reserve). The main roads within these boundaries include State Highway 29, Ōmanawa Road, McLaren Falls Road, Ruahihi Road, and Old Kaimai Road.

Census 2023

Source Info & Notes:

1. Data has been sourced from Census 2023 (see Totals by topic for individuals, (RC, TALB, UR, SA3, SA2, Ward, Health), 2013, 2018, and 2023 Censuses), Ethnicity (detailed total responses level 3), and Languages Spoken. Percentages provided for each topic are based on "Total Stated" (those who answered the related census question). They are not a percentage of "total population".
2. The latest population estimates see Stats NZ Place Summary - Kaimai
3. This variable combines all Census activity limitation questions to identify whether individuals (aged 5 years and over) have difficulty performing any of six basic universal activities because of a health problem. The activity limitations included are: seeing and hearing (even if wearing glasses/using a hearing aid), walking or climbing steps, remembering or concentrating, washing all over or dressing, and communicating (using your usual language). Read more at Stats NZ. This indicator is likely to underestimate people living with a disability. A more robust estimate of disability levels is available in the Household Disability Survey, but this is not available for small areas.

Deprivation Levels²

The New Zealand Index of Deprivation (NZDep) is an area-based measure of relative socio-economic deprivation (based on nine Census variables (outlined in the Table to right). A community with a rating of decile 1 is the least deprived, decile 10 is most deprived.

The Ōmanawa-Kaimai area has varied deprivation levels within its boundaries. When viewed at smaller SA1 level geographies Deprivation Index levels ranging from Dep 3 - Dep 8 are evident.

The map highlights pockets of higher deprivation alongside otherwise affluent areas.

NZ Dep2023 decile (SA2 - weighted average)

Dimension of Deprivation	Description of variable (in order of decreasing weight in the index)
Communication	People who have no access to internet at home
Income	People aged 18-64 receiving a means tested benefit
Income	People living in equivalised* households with income below an income threshold
Employment	People aged 18-64 unemployed
Qualifications	People aged 18-64 without any qualifications
Owned Home	People not living in own home
Support	People aged <65 living in a single-parent family
Living Space	People living in equivalised* households below a bedroom occupancy threshold
Living Condition	People living in dwellings that are always damp &/or always have mould greater than A4 size
